

PRODUCT DATA SHEET (PDS):

DANDO-CEL HV

DANDO-CEL HV

Multi-function high viscosity polymer mud additive

**Introduction
&
Benefits**

Stable, cost effective polymer for fresh or salt water muds. Excellent filtration reducer - promotes thin tough coating on porous borehole wall. Reduces wall sloughing and swelling. Reduces clay hydration and dispersion Greatly improves carrying capacity of the slurry.

**Appearance, Physical
and Chemical Properties**

Off-white powder, 1.6 s.g.

**Recommended
Treatment**

Add 500 gm to 4 kg/m³ to fresh or brackish water. Compatible with most mud additives - greatly improves bentonite mud - or can be used by itself Mixes easily through hopper

Packaging

Powder: 25 kg sacks, palletised.

Safety & Environment

Non toxic, biodegradable.
