

PRODUCT DATA SHEET (PDS):

DANDO-POL POWDER

DANDO-POL POWDER

Cost effective powdered mud polymer

**Introduction
&
Benefits**

DANDOPOL POWDER is a spray dried copolymer designed for fast field mixing, viscosity building, and shale stabilization.
Easy to mix
Concentrated for high yield
Does not ferment
Forms a tight, thin filter cake in unstable formations
Maintains borehole stability in both horizontal and vertically drilled holes
Reduces clay and shale swelling, bit balling, and sticking problems
Powerful lubricant

**Appearance, Physical
and Chemical Properties**

White powder

**Recommended
Treatment**

Up to 0.3 percent in water
For best results mix through hopper.
Otherwise, add VERY SLOWLY AND EVENLY to well agitated water.

Packaging

20 litre plastic pails; 25 kg sacks.

Safety & Environment

Consult MSDS Sheet prior to use.
