

PRODUCT DATA SHEET (PDS):

DANDO-VERT POLYMER.

DANDO-VERT POLYMER

Revertable, Biodegradable organic drilling fluid

Introduction & Benefits

Mixes easily & quickly.
Non-Toxic
Biodegradable
Reduces Friction
Cuttings Settle Quickly
Salt Tolerant.
For best results, mix slowly and use a jet hopper.
Can be broken down with bleach.
DANDO-VERT is an organic polymer drilling fluid additive. Benefits include:
Light Weight
Environmentally Friendly
Low Friction
Excellent Sample Quality
No changes required when drilling in brackish or saline waters.
Breaks down easily when required (add bleach solution)

Appearance, Physical and Chemical Properties

Off White powder

Recommended Treatment

5 to 10 kg per 1000 litres of fresh water for normal viscosity. For best results, mix slowly and use a jet hopper. Can be cross-linked (thickened) with borax to overcome lost circulation.

Packaging

25 kg sacks.

Safety & Environment

Highly biodegradable; Non-Toxic.
