

**PRODUCT DATA SHEET (PDS):**

**DANDO RESINEX GROUT.**

**DANDO RESINEX GROUT**

**High performance hydrophilic polyurethane Grout**

**Introduction & Benefits**

High performance waterproof grout.

Easy to use - can be pumped neat into the annulus or plenum to effect a seal.

By adjusting the water content, the final strength of the set grout can be controlled.

Foam action promotes expansion to provide a tight waterproof seal.

**Appearance, Physical and Chemical Properties**

Colour: Light Brown

SG: 1.1

Flash Point > 104° C

Viscosity is temperature dependent: approx. 1000cps @ 20° C

**Recommended Treatment**

Treatment methods will depend on specific site conditions. Can be pumped on a single component basis or mixed in-line with water. Contact us for detailed information and advice relating to your specific project. Important: Purge pumps and lines with RESINEX FLUSH before and after injection.

**Packaging**

Powder: 12.5 and 20 kg pails, 25 kg sacks, palletised.

**Safety & Environment**

Solvent free, contains no volatile organic compounds. Irritant. Consult MSDS and ensure proper handling precautions before use.
